Frontend developer with 3.2 years of hands-on experience specializing in Frontend development with the Reacts framework. Passionate about learning new technologies and working with dedicated teams.

PROFESSIONAL EXPERIENCE

Wipro Project Engineer

Kolkata, India
April 2022–Nov 2024

- Developed multiple user-friendly screens including product catalogue for the frontend using ReactJS. Utilized ready-made components from NPM and managed data efficiently with the Redux library to improve performance and user experience.
- Built a user-friendly dashboard using Chart.js and React to display sales trend.
- Integrated push notifications using Firebase Cloud Messaging (FCM) to keep users informed of new updates and offers.
- Collaborated with back-end developers to integrate REST APIs and enhance functionality.
- Integrated Azure Blob Storage for optimized media storage and retrieval, improving load times for product images.
- Integrated Google Analytics to track user behaviour and optimize UI/UX based on data insights.
- Utilized GIT for version control across all projects, ensuring seamless team collaboration.
- Actively participated in code reviews.

Exademy (Ed-Tech Startup) Software Developer

Remote
July 2021–March 2022

- Developed full-fledged website with the following features: Sell courses, Embedded video player to watch lectures, Payment integration with Razor pay, Student registration, student profile ,PYQ's page etc.
- Supervised and guided a team of 4 interns in Product development, providing mentorship, technical support, and strategic insights to enhance their skills and contribute effectively to project goals.
- Developed a platform to take MCQ Tests and publish result immediately after submission.
